BLUEANT WIRELESS STEREO HEADPHONES DELIVER WORLD FIRST IN TECHNOLOGY INTEGRATION

The Blueant Bluetooth Stereo Headphones and audio player is the first product of its kind in the world to integrate mobile, wireless and audio technologies into a multi-purpose entertainment device, providing the user with the ultimate solution for handsfree and stereo music headphones.

Released into the Australian market by leading mobile communication hardware provider, Blueant Wireless, the Bluetooth Stereo Headphones joins the growing stable of Blueant products designed to optimise Bluetooth technology for people on the move.

Blueant Wireless Managing Director, Michael Good, says, "The Bluetooth Stereo Headphones delivers wireless technology applications into one device superceding the need for people to have multiple accessories. It also provides excellent value for money."

This revolutionary product delivers:

- **Wireless Stereo music sent from your computer using Bluetooth - listen to streaming music, watch DVD's etc.**
- **MP3/WMA Player with 128mb Flash memory – store music on the headphones and enjoy total mobility with handsfree integration.**
- **Headset and Microphone to a computer using Bluetooth – online voice chatting such as MSN.**
- **Handsfree Mobile Phone use over Bluetooth**
- **Data Storage of any file type e.g. .doc .pdf .zip .exe.**
- **Crystal Clear sound quality**

The Stereo Headphones are compatible with any Bluetooth mobile phone and Windows XP and 2000 operating systems.

RRP - \$399.00 - Available nationally through Telstra Retail Shops.

Visit www.blueant.com.au for detailed product information and specifications.

Demonstration headphones are available for review purposes.
